

At Peak Technology, we develop and produce high-performance solutions for motorsport and aerospace. Our products power Formula 1 cars, launch rockets into space, accompany satellites in orbit, and win the 24 Hours of Le Mans. What drives us? The next tenth of a second, the next orbit. If you're ready to push boundaries, join our team.

And that's why we're looking for you as a:

PRODUCTION PROCESS PLANNER (f/m/d)

Are you looking not just to monitor process planning, but to actively optimize workflows and manage projects from initial planning through successful production? Then this is the right place for you.

YOUR MISSION

- **Project and Order Planning**
 - Scheduling across the entire project and order lifecycle based on available capacities
 - Coordination and monitoring of material planning and scheduling
 - Continuous review of capacity utilization and derivation of required actions
- **Production-related Planning and Control**
 - Creation, maintenance, and updating of high-level planning and forecasting
 - Support during new production ramp-ups and ensuring their process stability
 - Support in program planning for existing and new products
- **Master Data and System Maintenance**

- Maintenance and quality assurance of ERP-relevant master data for process organization
- Verification of production bills of materials, routings, and time-management data in the ERP system
- Maintenance of master data as well as views and reports in wayRTS
- **Process and System Optimization**
 - Further development and standardization of planning and work-preparation processes
 - Participation in projects related to process and production optimization
 - Ensuring efficient, transparent, and quality-assured planning, control, and coordination in production control, work preparation, and production planning

YOUR PROFILE

- Completed technical or commercial training, ideally with additional qualifications in production planning, work preparation, or process management
- Experience with planning systems (e.g., wayRTS, Ulysses) and common ERP systems
- Solid understanding of production processes, capacity planning, and master data management
- Analytical and structured approach combined with strong problem-solving skills
- Team-oriented mindset, strong communication skills, and cross-functional thinking
- Good command of written and spoken English

WE OFFER

- A versatile role in a successfully growing company
- Technical innovation and challenges in the motorsport, aviation, and aerospace industries
- Training programs to promote professional and personal development
- A collegial work atmosphere with a first-name culture in a company that values teamwork
- Meals provided by the company kitchen with freshly prepared dishes daily
- Flexible working hours
- Various company events
- Further benefits such as: Company mobile phone, company bicycle, climate ticket, corporate benefits, ...

Based on your education, qualifications, and professional experience, we offer an attractive, market-compliant starting salary from EUR 45,000.00 gross per year on a full-time basis. The actual remuneration will be determined in accordance with your individual educational background and relevant work experience.

We are looking forward to your meaningful application!
