PEAK TECHNOLOGY

At Peak Technology, we develop and produce high-performance solutions for motorsport and aerospace. Our products power Formula 1 cars, launch rockets into space, accompany satellites in orbit, and win the 24 Hours of Le Mans. What drives us? The next tenth of a second, the next orbit. If you're ready to push boundaries, join our team.

And that's why we're looking for you as a:

INDUSTRIAL ENGINEER (f/m/d)

You don't just want to code and design "somewhere"—you want to shape projects from the very first concept all the way through to full integration.
Then you're in the right place! You'll develop smart systems, streamline processes, and implement innovative solutions—all while seeing the results of your work come to life in real time.

YOUR MISSION

- PLC programming (Beckhoff TwinCAT 3) for smart systems

- Contribute to the design of machines and automation solutions

- Take projects from the initial idea and design phase all the way through to production integration of newly developed systems

- Retrofit existing equipment, create visualizations, and optimize processes

- Test, commission, document – and see the results of your work live in action

WHAT YOU BRING

- Technical background (HTL, university of applied sciences, or university) in mechatronics, mechanical engineering, automation, or a related field

- Initial experience with PLC programming – knowledge of Beckhoff is a plus

- Motivation to also contribute to mechanical design

- Openness, team spirit, and the drive to explore new paths

- Good command of both German and English

- Bonus points for Python skills or 3D CAD experience (e.g., CATIA V5)

WHY JOIN US

- A varied role in a fast-growing, successful company

- Exciting challenges and cutting-edge innovation in motorsport and aerospace

- Opportunities for professional and personal growth through training and development programs

- A friendly, team-oriented environment with a collaborative, first-name culture

- Freshly prepared meals from our in-house kitchen

- Flexible working hours to support a healthy work-life balance

- Fun company events throughout the year

- Additional perks such as a company phone, bike program, public transport pass, and other corporate benefits

Based on your education, qualifications, and professional experience, we offer you an attractive, market-competitive salary. This ranges between EUR 42.000,00,- and EUR 60.000,00,- gross per year on a full-time basis.

Sounds exciting? Then apply now and become part of a young, dynamic team that lives and breathes technology while shaping the future.
